

Semi Automatic Flat Knitting Machine

Changshu Changhua Smart
Manufacturing Technology CO,LTD

Machine Details

Product Display

- The Changhua Semi-Automatic Collar Knitting Machine offers a perfect balance of manual control and mechanical precision for small-to-medium apparel manufacturers. This versatile machine features a semi-electronic needle selection system that allows operators to efficiently produce various collar styles, including classic rib, roll-neck, and fashion designs, while maintaining consistent stitch quality.
- With adjustable stitch density and automatic yarn feeding, the machine handles multiple materials from fine cotton to wool blends with reliable performance. Its ergonomic design reduces operator fatigue during extended production runs, while the intuitive control panel enables quick pattern changes and tension adjustments. The compact footprint makes it ideal for limited workshop spaces.
- While requiring some manual intervention for loading and unloading, the machine achieves 40% higher output than fully manual alternatives. Its durable construction and easy maintenance ensure long-term cost-effectiveness. Changhua's semi-automatic solution provides apparel businesses with an affordable entry into automated collar production, combining the flexibility of manual operation with the efficiency of mechanical knitting - ideal for manufacturers transitioning to smarter production methods.

PRODUCT SPECIFICAYION

| | |
|---|--|
| 1 | Auto collar & cuff Knitting machine, with customized gauge and needle bed width |
| 2 | Program-able racking 1-2 needles |
| 3 | Equipped with front and gear both knitting bed with high butt /low butt needle |
| 4 | Combined Cam select by program design from control panel, with knitting /rest/tuck three way knitting technology |
| 5 | 2 stitch quality available program select and manual adjustable |
| 6 | 1-6 Yarn feeder on three rail guide,auto changes by program |
| 7 | Speed Come to Max. 1meter per second adjustable from Program |
| 8 | Auto knitting fabric take down |
| 9 | Rated Power: Single phase 220V 0.55 Kw |
